SUMMARY

DevOps Engineer with 3.5 years of experience in cloud infrastructure, CI/CD automation, and server management. Skilled in AWS services, Docker, and container orchestration for efficient deployments. Expertise in deploying ML models on Amazon Linux 2023 EC2, using MLflow for metrics and Superset for visualizations. Proficient in Amazon ECS (Fargate) deployments with Route 53 and SSL certificates for secure access. Experienced in GitHub Actions automation and managing Django and React apps with a focus on high availability and scalability. Proven track record of troubleshooting complex network and server issues, collaborating across teams, and delivering innovative, reliable, and secure solutions aligned with organizational goals.

SKILLS

- **Cloud & Compute Services:** Amazon EC2, ECS, S3 Bucket, CloudFront, RDS, Load Balancer, Security Groups, IAM & IAM Roles Access Management, Route 53, ACM, AMI, Elastic Beanstalk, Terraform, Kubernetes, Jenkins.
- **Data Analytics & Machine Learning:** Apache Superset - Data Visualization, Python (NumPy & Pandas, Data Preprocessing for models), MLflow - Model Metrics Tracking, Jupyter Notebook (ipynb), AI & ML General Concepts.
- **Web Development & Frameworks:** Django (Framework), Python Virtual Environment server setup management), Postman (API Testing: GET, POST), API Communication Integration.
- **Version Control:** Git, GitHub, GitHub Actions, Docker, DockerHub.
- **Performance Testing:** Apache JMeter – Performance & Load Testing.
- **IT & Network Administration:** Windows Server Manager, Active Directory (Roles, Groups, User Access), IIS Manager, Hyper-V Virtualization, RF Device Configuration & Troubleshooting.
- **Database Management & Reporting:** SSMS, SSRS, Crystal Reports.
- **Supply Chain Management & Software:** WMS-WareHouse Management System, Korber Core Application Initial Setup & Configuration, Advantage Architect-Backend, Page Editor-Frontend, Bartender-Print Management.
- **Project Management & Collaboration:** Agile Frameworks, Jira-Project Management, Confluence-Documentation, Google Slack, Microsoft Teams, ServiceNow-Rest Api Explorer.

EXPERIENCE

Enterprise Soft Labs Services Private Limited

--- Hyderabad ---  04/2022 – Present

Aws Dev-Ops Engineer

- **Infrastructure & AI/ML Model Deployment:** Designed and deployed end-to-end AWS infrastructure using Amazon Linux 2023 EC2 instances to host Django (Python 3.9) and React (Node.js) apps. Configured custom VPCs with subnets, gateways, and route tables for secure networking. Deployed machine learning models on EC2 for supply chain optimization and accuracy predictions, integrating MLflow to log and visualize model metrics. Used Apache Superset for interactive dashboards displaying model results and business insights.
- **Containerization & Automation:** Dockerized the apps using Docker Compose to run in separate containers. Pushed images to Amazon ECR and automated deployments with GitHub Actions CI/CD pipelines. Deployed on Amazon ECS (Fargate) with Route 53 and ACM SSL certificates for secure domain hosting. Automated frontend and backend startup with Supervisor, using config files to run both apps as daemons. Wrote Python and shell scripts to streamline deployments and instances.
- **Data Management, Security & Monitoring:** Used Amazon S3 for dataset storage and backups. Configured Amazon RDS (MySQL) to store app and model data with optimized querying. Stored credentials securely in .env files. Applied IAM roles and policies to restrict access to EC2, S3, and RDS, enforcing SSL/TLS encryption. Monitored performance with Amazon CloudWatch, enabled CloudTrail for API auditing, and optimized apps for stability and high availability.

WMS Staff Consultant

- Installed and configured end-to-end applications across Multiple projects, Handled **Migrations** across **DEV, UAT, and PROD** environments. Deployed applications and configurations with backup server databases. Installed and managed **SSRS, Bartender** (Print Management across Servers), **Korber Application, Page Editor**, and Advantage Architect.

Ranipet Municipality - Govt of Tamil Nadu

--- Ranipet ---  01/2021 – 09/2021

- Worked in Civil Municipal Projects, Specializing in Road Measurements, Cost Estimation (Excel), M-book Preparation, and Site Monitoring

G.K - Constructions

--- Ranipet ---  11/2018 – 12/2020

- Managed Warehouse Construction in a Central Government Electrical Power Grid Project, Creating Estimation Reports daily and Monitoring sites.

CERTIFICATES

 Full-Stack Development Training	---	 11/2021–12/2022	---	3Edge Solutions---Chennai
 Warehouse Advantage Certified Associate	---	 09/2023 –09/2025	---	Issued by Korber Supply Chain
 Aws Solution Architect	---	 01/2025–Present	---	RedSysTech
 Dev-Ops Mastery Program	---	 05/2025–Present	---	Guvi---Chennai

EDUCATION

B.E, Civil Engineering

 Avs Engineering College

 06/2014 – 04/2018

HSLC

 Sri Ramakrishna Hr Sec School

 06/2012 – 04/2014

PROJECTS

TXENIA – AI/ML Supply Chain Management Web App

- Developed a web application using React and Django, integrating AI/ML models with historical and real-time data. Deployed on AWS EC2, automated with GitHub Actions, and Dockerized for streamlined container management. Hosted via Load Balancer DNS and connected the domain with AWS services for seamless access.

Dr. Max | Czech Republic – Greenfield Project

- Migrated and deployed stored procedures, apps, and databases across DEV, UAT & PROD. Configured Bartender, Modified Stored Procedures, Performed Sanity Testing, and Configured Initial setup for Printers on the Servers.

Good Eggs – Migration

- Configured and migrated Page Editor, Advantage Architect, Bartender, and SSMS from HighJump to Korber across DEV, UAT, and PROD environments. Modified URLs and hosted the Korber Core app via IIS Manager for efficient deployment and accessibility.

Good Eggs – Support

- Managed the Good Eggs Ticketing portal to address order issues and bugs, providing effective solutions and documentations through Confluence and Slack.

Deccan & Cold Store

- Gained expertise in custom warehouse operations and processes based on client requests, effectively understanding and executed their requirements. Delivered client demos tailored to specific customer requirements, ensuring alignment with their business needs.

Training Period – MAERSK

- Assisted with Change Requests (CRs) and Jira bug resolution for MAERSK. Installed and configured Windows Server 2019 and set up OpenVPN on a physical server to ensure secure, organization-wide connectivity. Provided training and support to clients and interns on system usage and best practices.

STRENGTHS

 **Problem Solver:** Automated EC2 instance management and application deployments, reducing manual intervention by 40% and improving operational efficiency.

 **Collaborative Team Player:** Worked closely with cross-functional teams to migrate applications and streamline AWS deployments, ensuring on-time delivery and adherence to project budgets.

 **Strong Analytical Skills:** Conducted in-depth analysis of application performance and implemented efficiency improvements, reducing startup time by 25% and enhancing overall system responsiveness.
